

# TANSEER HUSSAIN

## Full Stack Developer

Gilgit, Pakistan | Available for hire on Upwork

### PROFESSIONAL SUMMARY

Full Stack Web Developer specializing in building modern, responsive, and scalable websites. Experienced in developing end-to-end solutions using **Next.js, React, TypeScript, Node.js, NestJS, Express.js, PostgreSQL, MongoDB, and Tailwind CSS**. Skilled in designing user-friendly interfaces, developing secure REST APIs, integrating databases, and optimizing application performance. I focus on writing clean, maintainable code and delivering reliable web solutions that meet business requirements and create real-world impact.

### SKILLS

- Frontend Development: Next.js, React, JavaScript, TypeScript, Tailwind CSS, shadcn/ui, TanStack
- Backend Development: Node.js, Express.js, NestJS, PHP
- Database Management: PostgreSQL, MySQL, MongoDB
- Cloud & DevOps: Docker, Git, GitHub, CI/CD basics, VS Code, Cursor
- Project Management: Team Leadership, Client Communication, Agile Development

### WORK HISTORY

#### Full Stack Developer | March 2022 – Present

APPRIC (SMC-PRIVATE) LIMITED | Gilgit, Pakistan

Lead a dynamic team of developers, designers, and strategists focused on delivering custom web and mobile app solutions. Responsible for full stack development, project supervision, client coordination, and ensuring top-quality digital experiences.

#### Project 1: GBK Tour App

- Designed and developed a complete tourism platform showcasing provinces, districts, tourist spots, and nearby hotels across Gilgit-Baltistan and Azad Kashmir.
- Enhanced user engagement by integrating responsive design, interactive maps, and optimized database structures.
- Collaborated with the UI/UX team to improve usability and app performance, resulting in a 40% faster loading experience.

#### Project 2: HMS (Hostel Management System)

- Designed and developed a comprehensive Hostel Management System (HMS) to streamline hostel operations, student records, room allocation, fee management, and administrative workflows.
- Built a modern, responsive web application using Next.js, React, Tailwind CSS, and ShadCN UI, with a scalable backend powered by NestJS and MongoDB.
- Implemented role-based dashboards and access control for four user roles: Super Admin, Admin, Warden, and Student, ensuring each user has access to relevant features and information.
- Developed dedicated dashboards for hostel management, student management, room allocation, attendance, fees, complaints, and administrative operations.
- Implemented secure authentication, authorization, REST APIs, database management, and role-based permissions to protect sensitive hostel and student data.
- Designed the system with a scalable architecture to support efficient communication and coordination between administrators, wardens, and students.

#### Project 3: Adiba Accessories Hub

- Developed Ecommerce platform for computer and mobile accessories with an elegant, modern interface.
- Implemented secure payment gateways, product management tools, and customer support integration.
- Increased online visibility through SEO optimization and mobile-friendly design.

#### Full Stack Developer | Nov 2023 – May 2024

VCKONECT Software House | Islamabad, Pakistan

Contributed to the design, development, and deployment of modern web and mobile solutions, collaborating with cross-functional teams to deliver user-friendly, secure, and scalable software solutions.

- Developed responsive websites and business applications using modern frameworks and technologies.
- Improved backend performance and database efficiency, reducing load times by up to 35%.

- Assisted in UI/UX design enhancements to ensure optimal user experience.
- Participated in project planning, testing, and deployment, ensuring timely and high-quality delivery.
